

HAGS®

Ivydene Play Area has been designed to ensure inclusive play and challenge differing age groups and abilities.

The NRG trail increases in difficulty providing:

- lower level challenging balancing and coordination
- upper body strength as children swing to traverse levels

Swing unit:

- cradle seat giving support to smaller children
- flat seat challenge to older children
- inclusive basket seat allows multiple children to swing in one go or an adult to sit and support a child and swing together

The bespoke UniPlay ship:

- stimulates imagination
- 12+ children can explore and develop at different levels
- multiple access at lower levels
- children can be transferred from a wheelchair to the low-level deck which gives easy access to the small slide
- higher level has more difficult access to the larger slide
- wheelchair accessible talk tubes will encourage communication and help develop social skills

Viper promotes:

- cooperative play
- loco-motor play
- challenging and exciting to multi-generational users
