

Statement of Reasons Waiting Restriction Review 2023B

To introduce, remove or amend existing waiting restrictions and parking places within the Borough of Reading. These changes have been requested by either members of the public or by local Ward Councillors. Some of these changes are intended to reduce safety risks for motorists and pedestrians.

These changes require that we create a new Traffic Regulation Order, or in some cases changing or revising existing Traffic Regulation Orders. We therefore need to carry out a statutory consultation. The results of the consultation will be presented to the Traffic Management Sub-Committee at its meeting in June. The Sub-Committee will review the feedback received and decide whether the changes should be made.
